User Guide

for fruit trees treatment

**Bioprotec Pom
Apple Maggot
Fly Trap**

INSTALLATION: During flowering, before petal fall.

REPEAT: No repetition necessary.

TIPS: Use one to two spheres per medium sized tree and hang the traps in the sunniest places on the tree.

Bioprotec Pom components can be sold separately.

Coddling Moth Trap

INSTALLATION: Hang in the tree from end of April to early June.

REPEAT: No repetition necessary.

TIPS: Covers an area of 100m² (1076 ft²) or about 5 apple trees or other medium sized fruit trees.

**Bioprotec Fungicide
Fruit Trees**

APPLICATION: From early May to late September.

REPEAT: Every 7-14 days in rainy weather.

TIPS: The scab spores germinate in rainy weather. Treat after rain as soon as the foliage is dry. For the concentrated formula, dilute 7.2 ml in 400 ml to 1 L of water.

**Bioprotec Eco
BTK for caterpillar
control**

APPLICATION: From the emergence of young caterpillars.

REPEAT: 3 to 5 days later if necessary.

TIPS: Use the highest rate (60 ml / 10L) for heavy infestation or when larvae are large.

**Bioprotec Sôp
Insecticidal
Soap - 1L RTU**

APPLICATION: From the appearance of insects.

REPEAT: Repeat every 2 weeks, as needed.

TIPS: Spray thoroughly the top and bottom of leaves and stem. The product must come into contact with insects.
